Lab ID	: opd 3510	Reg. Date	: 09/03/26
Patient Name	: Ms. RUBY PARWEEN	Report Date	: 09/03/26
Ref By	: Dr. Self	Age/Sex	: 26 Year/Female
Location	: Lab	Sample Collected At Lab	

EXAMINATION OF BLOOD.

1) Widal Test

TEST DONE	RESULT
Salmonella typhi 'O'	1 : 320
Salmonella typhi 'H'	1 : 320
Salmonella paratyphi 'AH'	NO AGGLUTINATION
Salmonella paratyphi 'BH'	NO AGGLUTINATION

Semi quantitative Slide Test :

Note : Positive Test is put up with doubling dilutions of serum from 1:40 to 1:320. Repeat testing with increasing titer is suggestive of infection with salmonella species.

Limitations:
This test may be negative in the first week of fever with salmonella infection.

Previously vaccinated indivisuals will show a positive test.

Positive results will also be seen in patients who have suffered from salmonella infection in the recent past.

2) PS FOR MP

Malarial Parasite : Not Detected.
